Profile Summary

- Proven ability to develop applications, integrate intelligent APIs, and design automation workflows.
- Proficient in applying Python, and modern AI development tools to build scalable, data-driven software solutions.
- Understanding of machine learning fundamentals, data preprocessing, and model evaluation for intelligent systems.
- Passionate about exploring emerging AI technologies, continuous learning, and building innovative solutions.

Relevant Coursework

- | | | |
|--------------------------------|------------------------|------------------------------|
| • Data Structures & Algorithms | • Operating Systems | • Foundation of Data Science |
| • Object-Oriented Programming | • Discrete Mathematics | • Generative AI |

Projects

Mergy — AI Code Risk Analytics | *XGBoost • Machine Learning • GitHub API • Next.js • TypeScript* **Jul 2026**

- Developed a machine learning-powered platform that analyzes GitHub repositories to evaluate repository health and identify engineering risks before deployment by integrating **XGBoost**-based predictive models with repository analytics to generate actionable insights.
- Designed a modern, responsive interface using **Next.js**, **React**, and **TypeScript** to visualize repository metrics, predictive analytics, and AI-generated recommendations.

Monex — Real-Time Currency Intelligence Platform | *Next.js • React • TypeScript • REST APIs* **Apr 2026**

- Designed and developed a production-ready currency conversion platform using Next.js, React, and TypeScript with support for real-time exchange rates and instant multi-currency conversion.
- Built interactive financial visualization features including historical exchange rate charts, currency search, favorites management, and seamless currency swapping.

Nocturne Theme — VS Code Extension | *TypeScript • VS Code API • UI/UX • VSCE* **Apr 2025**

- Designed and published a Visual Studio Code theme extension inspired by the Ayu Mirage theme, enhancing readability and developer experience, while creating a dedicated project website with installation guides, documentation, and versioned releases.
- Developed and packaged the extension using **TypeScript** and the **Visual Studio Code Extension API**, ensuring compatibility across supported platforms.

Technical Skills

Programming: Python, TypeScript, JavaScript, C, C++

AI & Machine Learning: XGBoost, NumPy, Prompt Engineering

Web Development: HTML5, CSS3, React, Next.js, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, GitHub API, REST APIs

Education

Kathmandu Engineering College

Bachelor of Engineering in Computer Engineering

Nov 2024 – Present

Kathmandu, Nepal

Extracurricular / Certifications

- Google Gemini Certified Student — Google | View Credentials
- Introduction to Python Programming — University of Pennsylvania | View Credentials
